

## B. INSTALLING BIRDCUIDES IDENTIFY ON IPOD, IPHONE OR IPAD VIA ITUNES

This guide for installing BirdGuides iDentify products on the Mac assumes that you have previously downloaded iTunes and installed your iPod, iPhone or iPad.

- 1 Do not connect** your iPod to the computer at the beginning of this procedure.
- 2 IMPORTANT:** First make sure that iTunes is configured to copy files to the iTunes Media folder (the default). In iTunes select **iTunes** from the top menu bar, then **Preferences**. Select the **Advanced** tab. Make sure that **Copy files to iTunes Media Folder** when adding to library is checked and click **OK**.
- In the **left-hand bar** of iTunes, select **Music** under **LIBRARY**. If you purchased this product on disk, insert the BirdGuides iDentify disk and wait until it mounts. Open a new Finder window, and in it open the **iDentify British** folder on the disk.
- If you purchased this product as a download, double-click on **iDentify\_British\_1.0.2.dmg**. Wait until it mounts and a new Finder window entitled **iDentify British** should appear.
- In iTunes, select **File** from the top menu bar, then **Add to Library...** Navigate to the **iDentify British** folder on the disk or in the download folder and select your preferred folder: **With Commentaries** or **Without Commentaries**.
- Once you've selected the folder you want, click **Choose** or **Open**. This may take a few minutes - do not be alarmed if nothing appears to be happening initially. The iTunes information window at the top will show the files being copied over. Once this has finished you should see all the tracks in your iTunes music library.
- When you have finished, you should **sync your iPod** to the computer. Plug in your iPod now. If your iTunes is set to Auto Sync, iTunes will now automatically update the iPod. This may take a few minutes; iTunes will tell you when it has finished in the top information window. You can now skip the manual update instructions below and continue with step 12.
- If your iTunes is set to update your iPod manually, plug in your iPod to your Mac, and wait for the iPod summary window to appear in iTunes.

The **Manually manage music and videos** checkbox will be ticked.

- In iTunes **LIBRARY | Music**, click on the heading of the **Artist** column - you should be able to scroll to the **BirdGuides - iDentify** tracks.
- Click on the first of these **BirdGuides - iDentify** tracks to highlight it, then scroll down to the last of the **BirdGuides - iDentify** tracks and, whilst holding down the **shift** key, click on the last of the tracks; the whole block will be highlighted.
- Drag the highlighted files and drop them on your iPod icon in the left-hand bar under **DEVICES**. This may take a few minutes; iTunes will show you the progress in its top information window.
- Select your iPod in the iTunes **DEVICES** list, and click on the Eject button.
- It is now safe to disconnect your iPod from the computer. To play the tracks on your iPod, scroll to **Music | Albums** - scroll to the required **family name (Album)** - then to the required track, and play.

## BRITISH BIRDS

## Windows Instructions

### INSTALLING AND PLAYING BIRDCUIDES IDENTIFY

This product contains files that you can copy onto your MP3 or MP4 player via your computer. Your player will need to be capable of handling full-length song titles, and ideally be able to display album artwork.

- If you have an Apple iPod, iPod touch, iPhone or iPad, then you should follow the instructions to install via iTunes on the next page in B.**
  - If you have another type of player, then you should ideally follow the instructions for installing MP3 files that came with your particular player. If you don't have any specific instructions for your MP3 player, you could try the generic procedure A. below.**
- The British version of iDentify has the option to load either with or without commentaries, whichever you prefer.
- You can see the list of species for which tracks are provided on this product by visiting:  
[www.birdguides.com/identify/british](http://www.birdguides.com/identify/british)

### A. INSTALLING BIRDCUIDES IDENTIFY ON MP3 PLAYER (GENERIC)

- Plug your MP3 player into your PC's USB port, wait until it mounts. Open My Computer and navigate to view the contents of your MP3 drive.
  - If you purchased this product on disk, insert the BirdGuides iDentify disk and double-click on the disk drive to view the contents of the disk in a second window. Open the **iDentify British** folder.
  - If you purchased this product as a download, double-click on **iDentify\_British\_1.0.2.zip**. It should open in a new window. Open the **iDentify British** folder.
  - Arrange your two windows so that you can see both your MP3 drive, and your **iDentify British** windows side by side.
  - Double-click to open your preferred folder: **With Commentaries** or **Without Commentaries**.
  - From the **Edit** or **Organize** menu choose **Select All** to highlight all of the files inside the folder you just opened.
  - To ensure that the correct file order is maintained, left click and hold on the top file of the highlighted block and drag and drop the block onto your MP3 window.
  - Once all the files have finished copying, click on the **Safely Remove Hardware** icon in the bottom right of the Taskbar. Select **Safely Remove USB Mass Storage Device** with the appropriate allocated drive letter for your MP3 player, then disconnect your MP3 player.
- You should now be able to use your MP3 player to browse and play the iDentify files that you have just installed.

## B. INSTALLING BIRGUIDES IDENTIFY ON IPOD, IPHONE OR IPAD VIA ITUNES

This guide for installing BirdGuides iIdentify products on Windows assumes that you have previously downloaded iTunes and installed your iPod, iPhone or iPad.

- 1 **Do not connect** your iPod to the computer at the beginning of this procedure.
- 2 **IMPORTANT:** First make sure that iTunes is configured to copy files to the iTunes Media folder. In iTunes, select **Edit** from the top menu bar, then **Preferences**. Select the **Advanced** tab. Make sure that **Copy files to iTunes Media Folder when adding to library** is checked and click **OK**.
- 3 In the **left-hand** bar of iTunes, select **Music** under **LIBRARY**.
- 4 If you purchased this product on disk, insert the BirdGuides iIdentify disk. If you purchased this product as a download, double-click on **iIdentify\_British\_1.0.2.zip**. It should open in a new window. Open the **iIdentify British** folder.
- 5 In iTunes, select **File** from the top menu bar, then **Add Folder to Library...** Navigate to the **iIdentify British** folder on the disk or in the

download folder and select your preferred folder: **With Commentaries** or **Without Commentaries**.

- 6 Once you've selected the folder you want, click **OK**. This may take a few minutes - do not be alarmed if nothing appears to be happening initially. The iTunes information window at the top will show the files being copied over. Once this has finished you should see all the tracks in your iTunes music library.
  - 7 When you have finished, you should **sync your iPod** to the computer. Plug in your iPod now. If your iTunes is set to Auto Sync, iTunes will now automatically update the iPod. This may take a few minutes; iTunes will tell you when it has finished in the top information window. You can now skip the manual update instructions below and continue with step 12.
  - 8 If your iTunes is set to update your iPod manually, plug in your iPod to your PC, and wait for the iPod summary window to appear in iTunes. The **Manually manage music and videos** checkbox should be ticked.
- 9 In iTunes **LIBRARY | Music**, click on the heading of the **Artist** column – you should be able to scroll to the **BirdGuides – iIdentify** tracks.
  - 10 Click on the first of these **BirdGuides – iIdentify** tracks to highlight it, then scroll down to the last of the **BirdGuides – iIdentify** tracks and, whilst holding down the **shift** key, click on the last of the tracks; the whole block will be highlighted.
  - 11 Drag the highlighted files and drop them on your iPod icon in the left-hand bar under **DEVICES**. This may take a few minutes; iTunes will show you the progress in its top information window.
  - 12 Right-click on your iPod in the **DEVICES** list, and choose **Eject** from the menu.
  - 13 It is now safe to disconnect your iPod from the computer. To play the tracks on your iPod, scroll to **Music | Albums – scroll to the required family name (Album)** – then to the required track, and play.

## INSTALLING AND PLAYING BIRGUIDES IDENTIFY

This product contains files that you can copy onto your MP3 or MP4 player via your computer. Your player will need to be capable of handling full length song titles, and ideally be able to display album artwork.

- **If you have an Apple iPod, iPod touch, iPhone or iPad, then you should follow the instructions to install via iTunes on the next page in B.** The British version of iIdentify has the option to load either with or without commentaries, whichever you prefer. You can see the list of species for which tracks are provided on this product by visiting: [www.birdguides.com/identify/british](http://www.birdguides.com/identify/british)
- **If you have another type of player, then you should ideally follow the instructions for installing MP3 files that came with your particular player. If you don't have any specific instructions for your MP3 player, you could try the generic procedure A. below.**

### A. INSTALLING BIRGUIDES IDENTIFY ON MP3 PLAYER (GENERIC)

- 1 Plug your MP3 player into your Mac's USB port, wait until it mounts, and then open a finder window. Navigate to view the contents of your MP3 drive.
- 2 If you purchased this product on disk, insert the BirdGuides iIdentify disk. Open a new Finder window, and in it open the **iIdentify British** folder on the disk.
- 3 If you purchased this product as a download, double-click on **iIdentify\_British\_1.0.2.dmg**. It should open in a new window. Open the **iIdentify British** folder.
- 4 Arrange your two finder windows so that you can see both your MP3 drive, and your **iIdentify British** windows side by side.
- 5 Double-click to open your preferred folder: **With Commentaries** or **Without Commentaries**.
- 6 From the **Edit** menu choose **Select All** to highlight all of the files inside the folder you just opened.
- 7 To ensure that the correct file order is maintained, click and hold on the top file of the highlighted block and drag and drop the entire block onto your MP3 window.
- 8 Once all of the files have finished copying, click on the **Eject** button for the MP3 player. When it disappears from the finder window, you can disconnect your MP3 player. You should now be able to use your MP3 player to browse and play the iIdentify files that you have just installed.
